**Why:**

- Because our homes are old and drafty.
- Because we need healthy, safe jobs.
- Because we want to fight global warming.
- Because winter's coming.
- Because the Green Communities Act needs to work for everybody.
- Because we're paying for others' prosperity with our health.
- Because we're paying more into the energy efficiency system than we're getting out.
- Because we're ready to weatherize our communities.
- Because we need others to step up.
